

Problem Solving

Draw a line from the problem to the correct solution.

PROBLEM

1. While shopping with mom, you get lost . . .
2. A stranger asks you to help look for his/her lost puppy...
3. You're walking down the street and a car stops and the person ask if you need a ride....
4. You always walk home from school with a friend, but today you decide to walk home alone and take the shortcut through the empty field...

SOLUTION

- a - Help the adult find the puppy even though he/she is a stranger.
- b - Go to the nearest sales clerk and ask for help.
- c - Avoid dangerous situations like walking home alone and taking shortcuts.
- d - Go and play in the toy department.
- e - You say "sure" and get in the car.
- f - Say "NO" to helping the stranger find his/her lost puppy. It's all right to say NO to adults if they want you to do something you know is wrong.
- g - You say "NO" and keep walking, never accept a car ride from anyone unless you have your parent's permission.
- h - It's all right to take the shortcut because you will get home faster.
